

Bolt.new

AI-Powered Full-Stack App Builder

Type an idea. Get a working app.

✓ Frontend

✓ Backend

✓ Database

What is Bolt.new?

Bolt.new = AI tool that converts

IDEA → FULL WORKING WEB APP

Frontend

React / HTML UI generated automatically

Backend

API logic built and wired up for you

Database

Tables & schema created automatically

Live App

Runs instantly with a shareable URL

How It Works

7 simple steps — from prompt to deployed app

1

Open Bolt.new

No setup needed

2

Enter Prompt

Describe your app in plain English

3

AI Generates App

UI + Backend + DB created

4

Modify & Improve

Iterate with follow-up prompts

5

Connect Services

Supabase, Stripe, GitHub

6

Run & Test

Live preview in browser

7

Deploy

One click → live URL

Core Concepts

Prompt-Based Development

Type in plain English — AI builds the app.
Example: "Create a login page with charts"

Full-Stack Generation

Builds Frontend (React/HTML), Backend (APIs), and Database schema automatically.

Browser IDE

Nothing to install. Edit code and see live output directly in the browser.

Live Preview + Deploy

App runs instantly. Share a live URL with anyone in one click.

Integrations

Plug-and-play: Supabase (DB), Stripe (payments), GitHub (code storage).

Token-Based Usage

Free: 300K tokens/day, 1M/month. Every prompt & generation uses tokens.

Advantages & Disadvantages

✓ ADVANTAGES

- ✓ Very fast development (minutes)
- ✓ No environment setup needed
- ✓ Full-stack generated automatically
- ✓ Best for beginners, startups, hackathons
- ✓ Real working code produced
- ✓ Easy UI + backend creation

✗ DISADVANTAGES

- ✗ Token cost increases with usage
- ✗ Not ideal for large enterprise apps
- ✗ Bugs may require manual debugging
- ✗ Limited customization vs manual coding
- ✗ Requires constant internet connection

Bolt.new vs Other AI Tools

Feature	Bolt.new	v0	Lovable	ChatGPT
Full App	✓ Yes	✗ No	△□ Partial	✗ No
Backend	✓ Yes	✗ No	✗ No	✗ No
UI Generation	✓ Yes	✓ Yes	✓ Yes	△□ Basic
Deployment	✓ Yes	✗ No	△□ Limited	✗ No
Speed	⚡ Fast	Fast	Fast	Medium

 Bolt.new is the only tool that provides full-stack generation — frontend, backend, database, and deployment — in one prompt.

Token Usage & Free Credits

300K

tokens / day

Daily Free Limit

1M

tokens / month

Monthly Free Limit

Real Usage Breakdown

Simple Page

~20K – 50K tokens

Medium Feature

~100K – 300K tokens

Full App Build

~500K+ tokens

Use Cases & Limitations

✓ WHEN TO USE

Quick project build / MVP

Idea testing & prototyping

Client demo creation

Learning full-stack flow

ERP modules, dashboards, APIs

✗ WHEN NOT TO USE

Highly secure banking apps

Large enterprise systems

Complex architecture projects

Best For: Beginners · Startups · Hackathons · Rapid Prototyping · Full-Stack Learners

Summary

🚀 Type an idea → get a complete web app

🧠 AI handles Frontend + Backend + Database

⚡ No setup · Browser-based · Live preview

🔌 Integrates with Supabase, Stripe, GitHub

🆓 300K tokens/day free · Scales with paid plans

🎯 Ideal for MVPs, demos, learning & rapid builds
